

Introducing the X4000

Revolutionary pain management therapy

PainBan's X4000 is clinically proven technology that provides lasting relief for chronic pain sufferers, without drugs and with no side-effects.

The X4000 helps to soothe pain symptoms for acute and chronic pain and can be used freely with other treatment forms.

The X4000 is safe and effective:

- Reduces and removes pain
- Promotes wound healing
- Reduces pain-induced stress levels
- Encourages the release of natural pain control chemicals
- Treats cells directly through pulsed induction waves
- Stimulates stem cell activity to accelerate healing
- Works unhindered by any medical dressing, including Hydrogel and plaster casts

X4000 Pulsed wave therapy promotes healing

Rather than simply blocking pain, the X4000's patented pulsed wave emissions act directly at cellular level promoting healing:

- Increases oxygen content of the blood
- Improves blood supply to damaged cells and tissues
- Improves blood circulation without affecting heart rate or blood pressure
- Triggers metabolic reactions
- Strengthens immunological system
- Improves body cell functions
- Normalises cell membrane activity

The X4000 is changing lives of chronic pain sufferers

People who suffer side effects of pain killing drugs or do not respond to traditional or complementary therapies, consistently report a good rate of success with PainBan's X4000. It is compatible with acupuncture, physiotherapy, chiropractic, osteopathy and acupressure.

Unlike TENS, TSE, Electro-acupuncture or Electric shock methods, the X4000 does not rely on blocking 'pain gateways'.

X4000

Your questions answered

Does the product contain magnets?

No. The product contains no magnets of any kind.

Does the PainBan X4000 have support from the medical profession?

Yes. The device is used by GPs, practitioners, therapists and has also undergone trials in several areas of therapy in the UK and Germany. It is classified as a Class IIa Medical Device. The product is also protected under existing patent applications worldwide.

Can I use it anywhere?

The device can be used anywhere provided it is within the stated guidelines e.g. do not use in water or during air travel.

Will it hurt in any way?

No, provided the device is used correctly in accordance with the usage instructions. Using PainBan X4000 will not cause any discomfort. It is possible that you will experience a rather pleasant 'dragging' sensation that may be accompanied by a hot or cold feeling, depending on the sensitivity of your skin.

How regularly can I safely use the X4000?

You can use the device as many times as you like, although it is programmed to deliver treatment in seven-minute cycles. You may repeat and continue as required, but we recommend you take a break after four treatments. We also recommend being seated (as far as possible) when applying treatment.

Is it simple to use?

Yes. It is easy to use and can readily be applied by the sufferer or by a carer.

How does the device work?

The PainBan X4000 interacts with the body's own healing mechanisms which in turn help to alleviate pain naturally. The output of the device is designed to maximise the affect on the known alleviators of pain and should give pain relief for a wide variety of pain conditions. Users of PainBan's X4000 have experienced pain relief for many types of pain including: Arthritis, carpal tunnel syndrome, frozen shoulder, housemaid's knee, muscle and joint pain, muscle spasms, rheumatoid arthritis, sciatica and tennis elbow and many more.

Will the bioelectromagnetic field cause me any harm?

No. The system uses very low frequency and does not radiate any high frequencies, unlike mobile phones or many other devices.

If I have a medical condition should I consult my doctor first?

You should consult your doctor before using the PainBan X4000 if you are pregnant, have a pacemaker fitted, or suffer from epileptic fits.
